

We are pleased to inform you that
the new **2014/2015 General Catalogue of PALAZZOLI**
is now available

Institutional pages

More than 5,000 items in 464 pages with detailed technical and commercial information.

The Catalogue has a totally new presentation.

It is subdivided into 11 product categories referring to 4 main sections: INSTALLATION (green colour), ATEX (orange colour), MARINE (blue colour), AUTOMATION (red colour) and finally SERVICES.

The introduction consists of an overview of the PALAZZOLI markets, the development of the Company and the product offer through the 110 years of activity and the values on which the Company strategy is based.

Product offer

Each product family is represented by a picture showing the application, followed by the product features, the technical tables indicating the compliance with regulations, materials, IP rating, resistance to impact and vibration, current, voltage, etc., and the specification data.

All 6-digit items are tabled in a clear way to assure a prompt identification.

The technical tables do offer additional information such as the specific characteristics of each product range, applications and also references to the pages of the dimensional drawings and technical specifications included in the Catalogue.

You can also find important indications that remind, while going through the sections, which could be the products to be proposed to complete the installation system.

Finally, the part dedicated to services.

Spare parts are completed with information and guides about standards and laboratory tests according to the different product applications.
